WILL REBUILD BRICK PLANT

Royalton Industry Will Be Ready By Middle of August

Contracts for the rebuilding of the Middletown shale brick plant and the construction of a new siding at the plant will be let by B. Dawson Coleman, the owner of the works.

The Royalton Borough Council at a special session passed the ordinance providing for the relocation of the road leading past the plant, so that the factory can be enlarged. Under the provisions of the ordinance the owner agrees to give to the borough all the old brick taken from the present kilns, which are in a bad state of deterioration and which will be razed, for the new road.

A portion of the siding, which will run directly into the plant, has already been completed and a force of men will soon be put to work remodeling the factory.

The manager says it will have one of the kilns completed and be making bricks by the middle of August.

Plans for additional rooms were discussed but no action was taken. At present there are eight rooms in the building, but all are taken, and in the fall term the rooms will be so crowded that some action will be necessary. Ground for an addition to the present building has already been purchased.

LEBANON VALLEY PRESIDENT QUILTS

Resignation of Rev. Lawrence Keister is Received and Accepted

The Rev. Lawrence Keister, S. T. D., D. D., for the past five years the efficient president of Lebanon Valley College, tendered his resignation to the board on Wednesday of last week, to take effect at the close of this year. The board of trustees accepted his resignation and passed resolutions expressing their great appreciation of his worthy services and of his integrity and honesty. During the administration of President Keister the financial interests of Lebanon Valley College have been placed on a solid foundation and the school has been growing and prospering. President Keister lately equipped the science department, covering the dept by raising a "\$100,000 fund for the indebtedness and for the establishment of a solid endowment." He has put into action an ideal plan for its success.

Professor S. Hoffman Derickson, secretary of the faculty, has been chosen acting president until the committee for the securing of a new president can report favorably. The committee is made up of the Rev. Dr. W. H. Washinger, of Chambersburg; the Rev. Dr. Lowery, of Harrisburg, and the Rev. Dr. Statton, of Hagerstown, Md. The vacancy will not be filled for some time.

A pictorial exhibit of Lebanon Valley College has been arranged by L. B. Harnish and was placed in the State Department of Public Instruction at Harrisburg this week. The exhibit consists of the views of all the college buildings and the various groups of students and classes.

POWER OF SUPERVISORS

With the growing demand in all sections for good roads, supervisors have been doing more work upon the roads this spring than for years. A handicap encountered in some places was the lack of knowledge on the power of the supervisors to enter upon adjoining lands and maintain ditches through the same to drain the public roads. Nor does the power of the township supervisors end here. They may by injunction prevent an adjoining landowner from interfering with the drainage of a public road upon his land although his action might also be punished by a fine.

THE Y. W. C. A. HEARS MISS MOORE

Miss Margery J. Moore, Executive Secretary of the Territorial committee of the Y. W. C. A. for Delaware, Maryland, and Pennsylvania, gave a talk to the women of the Y. W. C. A. on Sunday, June 16th. Miss Moore proved a very able and interesting speaker. Acquainted with all branches of the Y. W. C. A. work in our own district, as well as in other fields, it was possible for her to give her hearers a broader view of this world-wide movement. As an outline for her talk she named the various fundamental principles of the association work. She said, "The work is first of all a constructive and preventive agency. It is a democratic institution, an adaptable instrument, and a progressive movement. But finally, it is a Christian association."

Miss Moore went on to name the types of association work, at home and aboard, giving incidents relative to each. She ended her talk with words of commendation for the past success, and of hope for a greater future for our own association.
