

Here's what he's doing...

And here's what you can do to help him!

 When his basic training's over and he's sent to fight the hard-hitting Nazis and Japs, you want him to have the finest fighting equipment a man ever had—and plenty of it.

You—yes, *you*—can help him get it . . . by putting every dime and dollar you can into War Savings Bonds—at least 10 percent of your pay every pay day!

So take a look around. You could save more, couldn't you—for him—if you took the bus to work or shop instead of the car?—if you didn't go for a drive on Sundays?—if you didn't buy that "extra something"?—if you cut

some useless spending here and some more there. Sure you could.

And just think! Those extra dimes and dollars put into War Savings Bonds might end the war sooner, bring him home safe and sound a day, a week, a month sooner than if you didn't save those dimes and dollars.

When you think of it that way, it makes you want to go out right now, doesn't it, and bring home the biggest Bond they've got at the bank or at the Post Office? Well, why not? There's nothing you could do that would help your boy more!

PTA Begins Fall Sessions

County Council plans program of "PTA in War Time"—Pottstown woman is candidate for state president to be elected.

The Montgomery County Council of Parents and Teachers opened its Fall season of activities with an Executive Board meeting last Wednesday at the County Court House, Norristown. The president, Mrs. Philip T. Flach presided. Work for the coming year was discussed and the organization will go forward with its program of "PTA in War Time."

Representatives of the 1200 local units in the State will attend the three day convention at Harrisburg, October 6-8. This 37th convention of the Pennsylvania Association of Parents and Teachers will be the most important meeting of the new season for this group. War time services and activities which revolve around the home and school will occupy most of the sessions. Election of officers will take place and Mrs. Edwin F. Yarnall, Pottstown, has been nominated for the presidency. Mrs. P. Burgin Digby, the retiring president, will be one of the principal speakers. Her topic will be "The Forward Look."

In the pre-meeting message to all Parent-Teacher members, Mrs. Digby wrote: "The main objective of the Parent-Teacher Association has always been to unite the forces of home, school and community in behalf of children and youth, an objective that today is regarded as more important than ever. War has brought no abandonment of any organization projects but merely a shift to wartime basis. This will be a working convention. The inspiration and good fellowship we will enjoy, the working together and information we will receive will make it the most important convention of our history."

Mrs. Paul Leonard, national vice president, will develop the convention theme "America Strong with Spirit Free" and the delegates will hear Rev. T. M. Keith, Pottsville, at the banquet session. He will discuss "The challenge of being an American."

Other prominent speakers include Dr. Francis B. Haas, State Superintendent of Public Instruction; Dr. Joseph Miller, National P. T. A. Chairman of Mental Health; and Miss Laura Drummond, Director of Home Economics, State college. Conferences for local leaders, parliamentary procedure, condenses and section meetings will be featured. There will be exhibits of congress publications, posters and displays of local unit or council projects and local unit Publicity Record Books which were judged winners at council contests. Abington Senior High, Glenside-Weldon, Benjamin Meyers, Overlook and Spring House are eligible to compete in the State contest as they were first prize winners in the Montgomery County competition this year.

Montgomery County Council will be represented at the convention by its president, Mrs. Philip Flach, Lansdale. Council members present at Wednesday's meeting were: Mrs. Philip Flach, Lansdale, president; Mrs. James Marz, Willow Grove, first vice president; Mrs. Russell S. ADVERTISE IN THE RECORDER!

TREND OF EVENTS BY CONGRESSMAN J. WILLIAM DITTER

In his message to the Congress on Labor Day, the President declared that it is impossible to keep any prices stable—far prices or any other prices—if wage rates, one of the most important elements in the cost of production continue to increase. The unfortunate thing is that it took the President so long to come to this conclusion. Many

members of the House made the same point more than a year ago. They insisted at that time that the price-control program as then outlined, and as it has since operated, was a snare and a delusion. It has been nothing more than an extravagant and exceedingly expensive camouflage which has deceived thousands of Americans and which has opened the door to dictatorial methods and procedure.

The American people have been paying the bill for the maintenance of a colossal anti-inflationary machine, employing thousands, and all the while, the spiral of inflation has been moving steadily upward every day. The President's statement on Labor Day was sound. It would have been an equally sound statement a year ago. The delay has been costly.

The average wage-earner knows that it is in store for all of us if the price spiral is allowed to go unchecked. He realizes that he has been made the innocent sufferer of a system which has exploited him, which has sought to barter for his favor, and which as permitted a few men to gain a mastery over him. He undoubtedly is aware of the conditions which face him, when wages are paid in dollars of increasingly dubious value, instead of in terms of purchasing power. He resents being made the pawn of political strategists.

Those who were hopeful that the House would take action to keep prices stable were doomed to disappointment. Instead of holding the few men to gain a mastery over him, the House had just heard the bill invites further increases in the cost of living by boosting the much discussed parity level. A wide the latitude of authority is allowed the President where "gross inequities" exist, what about that Italian composer. But no measuring rod is established. Moderato? I've seen his name on as what "gross inequities" are, or lots of music.

how they shall be determined. The door is left open to the exercise of unlimited discretionary authority on matters which should have fixed legislative limitations. No one can over-estimate the dangerous portent of inflationary movements already under way. They should be checked promptly by positive, certain and courageous action on the part of the Congress and the President.

MODERATO? OF COURSE!

Three ladies, who had attended a musicale, were discussing the merits of the composers whose music they had just heard. The first lady believed further increases in the cost of living by boosting the much discussed parity level. A wide the latitude of authority is allowed the President where "gross inequities" exist, what about that Italian composer. But no measuring rod is established. Moderato? I've seen his name on as what "gross inequities" are, or lots of music.

THE MEN BEHIND THE BUSINESS BACKS THE MAN BEHIND THE GUN!

There are miles of open water between the counters and the Caucasus—and all the battle stations in between! But in this war distance means nothing. What is happening in Cleveland, Louisville and Rochester has a tremendous influence on what is happening in China, Libya and Russia.

Take the matter of price control, for instance. By cooperating in holding down rising prices, your merchant is making a major contribution to America's war effort. By doing his part to prevent inflation he is bringing Victory that much nearer.

He is doing his part on the firing line, too. Our boys will fight better if they know there won't be any post-war depression to fight when they get back home.

Yes, your merchant, going about his daily job, posting his ceiling prices, marking the prices of his goods back to the levels of March, is a key man in wars as he has always been a key man in peace—a key man and a HE man on the home front! His cooperation cheerfully given, to the office of Price Administration, is Sealing the Ceiling from price raids.

He is proud of his part—proud in the knowledge that his employees are cooperating with him and Uncle Sam, 100%.
