## SPIRIT OF '28

June, 1928! This month marks the peak of our high school career; soon our high school days will be but memories. We cannot stand still or cause the time to cease its steady march. That is not the plan of life. Therefore we must keep moving with the time and meet the new situations that life brings us.

Our high school days have been days of labor, not without their moments of pleasure. We have formed many friendships, and it is indeed with sorrow that we break off our daily relationship with our associates here.

It is natural that we now think seriously of the benefits that we have received. It is indeed with deep gratitude that we think of the faculty who have helped us in our high school career. We have found them ever willing to advise and to instruct us. We could not wish for a more faithful body of leaders than they have been, and we wish to thank them.

At the head of our faculty are a most competent principal, F. L. Orth, and his assistant, E. R. Patterson, who have always been co-operative with our class in every worthy undertaking. We appreciate the manner in which they have made the road more pleasant for us.

It has been our good fortune to have as our class supervisor, Miss Dorothy Edmunds, who has inspired and directed us throughout our entire course. With an ever ready word of advice or encouragement, she has capably guided us, until at last we have reached our goal, and to her we give much credit for our success.

In our three years of high school we have learned that success is the fruit of labor. In this brief time we have realized the meaning of co-operation. Here we have seen that we cannot be entirely independent. We must work in harmony with our fellows in order to attain the best results. It is this part of our education that we value highly and with this spirit we hope to be able to meet and overcome the obstacles of future times.

We appreciate all that has been done for us; now as we pass from the halls of Alma Mater we leave our good wishes to the students who

remain. We know that the places we leave will be capably filled. We advise our successors to use all their time profitably and well. Work to attain the best things for your school and ours. We bid farewell to New Castle Senior High School hoping that we have contributed our best to her worthy history and wishing her greater success in the future.

### YESTERDAY AND TOMORROW

Undoubtedly joys and sorrows, laughter and tears go to make up the interesting fascination of the present. The future is hazy with a rosy glow of ambitious anticipation, and we dance toward it with buoyant steps. Yet, strange as it may seem, it is the past which holds for us the deepest attraction. It treasures for us the memories which chain us with golden links to persons, places or things and give us frequent thrills of joy as we recall them one by one.

Seniors, our high school days will soon be placed in that house of shining recollections! What a host of glittering links they have added to our chain! Our faculty—yes, we have fumed and fretted at their methods, yet down in our hearts we have a deep admiration and sincere affection for them. Among the students we have cultivated acquaintances and friendships. Each boy and girl has received a certain amount of criticism, and yet there is not one of us who would willingly part with any one of them. Our building—indeed, we have frequently heard fault-finding opinions about it and yet what an uproar there would be if Mr. Orth suggested exchanging it for another. How wonderful our three years seem to have been and how worthwhile and enjoyable everything looks when the time draws near for our departure.

Senior classmates, within a short time we shall be members of the Alumni! Our class will be mentioned by numerals, not by a title or by any reference to individuals. We shall be mingled with the crowd of spectators on the side lines. We shall be scattered far and wide, each to a different task, each on his own road. Then it will not be "to was or not to was" in the past but it must be "to be or not to be" in the future.

Time does not linger but rolls onward in its steady pace. We must go on as others have gone on before us, living, loving, working, climbing. Treasure your memories and your friendships, Seniors; be wise, kind, and thoughtful and above all play the game square!

"Let nothing pass, for every hand  
Must find some work to do;  
Lose not a chance to waken love—  
Be firm, and just, and true;  
So shall a light that cannot fade  
Beam on thee from on high,  
And angel voices say to thee—  
These things shall never die."

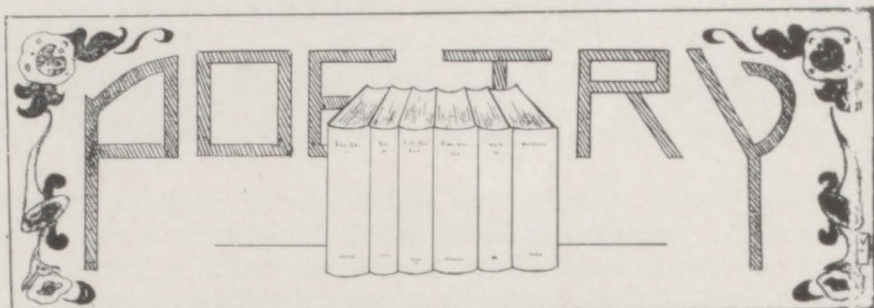

## WHY GO TO COLLEGE

As the spring season arrives and sends into the world its usual number of high school graduates, the question arises, "Why go to college?"

The first reason which should be considered, perhaps, is the question of vocation. One's life work is something which is not to be scoffed at. What one will be in ten, twenty, or thirty hence is largely dependent upon the preparation which he acquires. Where is a better place to gain this preparation than in college? True, it sometimes occurs that people who have not gone to college earn more—in money—than the college graduate, but that person is stationary. What he earns now, he will earn in thirty years from now. He has no preparation, no background, no foundation. He cannot grasp the chances which come his way. He cannot open the door when opportunity knocks. The college graduate, on the other hand, has the necessary background and foundation. When opportunity knocks, he is able to open the door to it, for he is perfectly capable of doing the difficult work which comes with responsibility. Thirty years from now will find the college graduate a financial and social success.

Preparation for one's life work, however, is not the sole work of a college education. Money is not the only target for which humanity should aim. Money cannot buy the things which make life really worthwhile. Money cannot buy friendships; it cannot buy ideals and ambitions; it cannot buy love of knowledge and appreciation of good literature; it cannot purchase that versatile nature which places one among the cultured; it cannot buy that correct outlook on life which spells happiness, and these are the things—the main things—for which a college education is intended. Money without these things is as useless to the modern man and woman as it was to King Midas of old. Friendships which are made in college are the true, lasting type; they are friendships which make one bigger, better, and braver. The ideals and ambitions which one gains while he is at college are the ambitions and ideals which make the Shakespeares and Miltons of tomorrow. Love of knowledge, appreciation of good literature, a versatile nature, and the correct outlook on life—these are things which only a college education can provide. These are the things which make our famous men and women really great. They are the things which make for happiness; they are the things which make life worth living. Money cannot buy them. Gold will not purchase them, for they are worth more than money; they are worth more than gold. They are acquired only at college. There, in that institution which makes men out of boys, and women out of girls; in that institution which polishes not only the surface, but the interior; in those ivy-covered walls known as college, one gains the things which give life that golden hue, and make it worth living.

A COLLECTION BY VIRGINIA SLEE

### THE BREEZE AND THE CLOUD

I stood upon a hill-top and thrilled at the voice of the Breeze.  
 And I listened to what he was saying, as he rustled in the trees.  
 "Do you want to buy a Cloud, Small Girl?" I heard him say to me.  
 "A Cloud,—a nice, soft fleecy one, to sail across the sea."  
 A Cloud!—A Cloud for sale,—and he wanted to sell it to me!  
 A Cloud, a nice, soft fleecy one to sail across the sea!  
 "The Price," Sir Breeze said softly, "is just a tiny sum,  
 And a Small Girl could easily pay it.—Come, Small Girl, do come!"  
 I wanted my Cloud, oh, I wanted it; so I would go, I said,  
 And I tried to grasp my little Cloud, flung my arms above my head.  
 But the Breeze grew up into a Wind, and he snatched my Cloud away;  
 And he laughed as his words came back to me, "You must stay, Small  
 Girl, you must stay!"

### WHAT I WANT

I want to be true,—to myself first of all—  
 And merciful, just, and kind.  
 I want to pick up my friend, if he fall;  
 I want to be eyes to the blind.  
 I want to be big and be grateful,  
 To be open and pure of mind.  
 I want to be thankful for goodness,  
 Contented with all that I find.  
 I want mine a heart that is fearless,  
 Yet stabbed with the keenest pain.  
 I want mine a soul that is stainless,  
 Or, stained to be whitened again.  
 But I want most of all, for I need it,  
 A gift cherished since time began.  
 I have true faith in our kind Christ—  
 And now I want faith in Man!

### UNSATISFIED

When I look through my own small doorway  
I see nothing but dull, sordid earth,  
While a glance through my neighbor's doorway  
Shows beauty and love and mirth.  
Yet my neighbor dislikes his doorway  
And he wants to look just through mine,  
For to him, his view is homely,  
While mine shows to him all that is fine!

---

### CONTRAST

A leaf can start happy tears that sting,  
And a dawn makes my heart leap high;  
My being will thrill at a lovely thing,  
Will respond with a throbbing cry.

But

I ache at seeing a fire that is dead,  
Or a wistful smile on an old man's face.  
I think I would rather believe, instead,  
That the world's an all-joyous place!

---

### THE LOW PLACES

Some say that God loves the mountains  
Better than all the world  
Because He puts them near the sky,  
With fluffy cloud-wreaths curled  
About their white-tipped heads.  
He dipped them in star-light and sun-light;  
He topped them with crispy snow;  
He told them the secrets of bird-life  
And how the flowers grow.  
He filled them with joy of the morning,  
He showed them the colour of things,  
He taught them to feel the rushing  
From startled birds' swift wings.

But I think God best loves the valleys,  
That nestle cool and low,  
Because it's into the valleys  
That Love and Friendship go!

## AN INVOCATION

LUCY H. ROSATI

Ye gods of heaven, hark to me I pray.  
 List to my pleadings; lend your ears to me;  
 Give us your aid, your help, and your advice,  
 And through this life our patrons and protectors be.

To thee, Three Fates, Clotho, Lachesis, and Atropus,  
 We dedicate this life, here on the earth.  
 Weave into it our share of happiness—  
 Our share of failure and success, of joy and mirth.

To fair Minerva we confide our minds.  
 With thine own wisdom rule them gently o'er.  
 Give us that virtue that penetrates the top;  
 Make us love knowledge for its sake forever more.

To dainty Venus we do give our eyes.  
 Sweet spirit, give us grace and sight to see  
 The Beauty in this world of shame and sin—  
 The fairness of the common things that are round me.

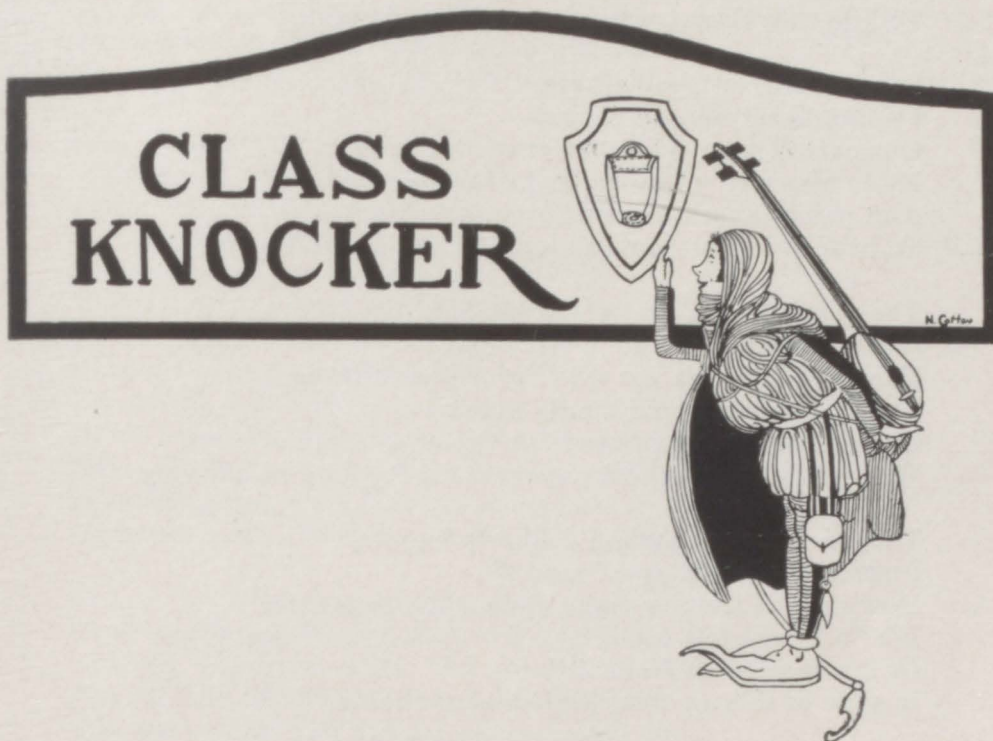

And Fama, thou goddess of the world's fame,  
 Forget not us, thy humble servants here.  
 Give us our share of thine abundant fruits,  
 And some day, take us to that goal, to each so dear.

Fortuna, thine assistance we implore.  
 Scatter on us—not carelessly, but fair—  
 Some of thy numerous gifts, some of thy smiles;  
 Give us that happiest of gifts, contentment rare.

Neptune, King of the waters of the sea,  
 Guard us as we traverse the sea of life.  
 Forbear thy waves of sin, and vice, and woe,  
 And let us reach that other shore without a strife.

Sweet gods, to thee we consecrate ourselves.  
 With thine all-seeing eyes, watch us we pray.  
 Guard us from every sin and shame and crime;  
 Keep us from wrong as we go on life's dim highway.

MARY ELIZABETH GIBSON

A 'NOCKER'S RAVIN'

Read to "Melody of Love"

Once upon a school day dreary,  
While I pondered sad and weary  
Over many a trial and mishap of remembered lore,  
Suddenly an inspiration  
Of my brain cells took possession—  
The bright idea that I would make my class mates sore.

So my business then is knocking,  
Other's weaknesses I'm mocking,  
Since they have made life miserable for me before.  
No, I shall not use discretion,  
But, instead, it's my ambition  
To tell you all I ever knew of them, and more.

Revengeful hammer now I'll wield,  
The faculty's doom will first be sealed.  
Escape they did for three long years, but now they're caught.  
Every year they get a knocking,

To them it may be really shocking,  
To find they're not respected as they thought.

Poppy Orth, or Daddy, here,  
I'd like to set him on his ear—  
Our patron saint who's never seen to grin.  
Made him sore when we broke the rule  
And painted our numerals over the school—  
To hear him rave you'd thought it was a terrible sin.

The class'd think that I was lacking  
If Edmunds did not get a whacking—  
The supervisor we got who never does a thing.  
I wish that you would kindly note:  
Our class has always been the "goat"—  
We got that new school paper, to say nothing of our ring.

Those language sharks I'd like to handle,  
I mean VanDivort and Crandall;  
How they've tried to make me work is sure a sin.  
It's "a Vergil test today",  
Or it's "parlez en francais".  
In spite of this my dear diploma I shall win.

Oh, to throw a couple scoffs  
At our dear red-headed profs—  
Calvin, Elliott, Thompson—and Irvine who directs the band.  
Our Republican "Ockie", I avow,  
And Miss Dinsmore will have a row  
Over whose party'll be the next to rule our land.

Louie Hazen takes the cake,  
As class president he's a fake—  
If you don't believe me, cast your eyes that way.  
Then there's Ted Blaha and the rest,  
The least that's said may be the best,  
In officers "we sho' got gypped" as they say.

Oh, of course, I realize  
Betty Steen would take the prize  
In bluffing folks to thinking she can play a bit.  
Elmer, Mac, and Charles, the fashion show—  
Those three have surely let us know  
That brains are not essential if you want to make a hit.

At this time it might be well to mark  
Barbara Sleigh, our Latin "shark".  
This so-called brilliant lassie **thinks** she knows her "stuff".

Oh, yes, and I'm reminded here,  
To mention our gridiron hero, Bob Sherer,  
Of whose football playing we've had more than enough.

Bob Weingartner is his father's son,  
Went into politics as he has done,  
For of Student Council he seems to be the boss.  
Gertie Potter writes its minutes,  
For dumbness she exceeds the limits,  
When they're gone I hope the school appreciates its loss.

Harold Sankey's one I wish to knock,  
He says he wants to be a doc—  
Don't trust him, friends, he'll feed you poison of some sort.  
Now, words, indeed, are much too weak,  
In relating how Paul Palmer can speak:  
He plans to be a lawyer and run Taft out of court.

For some whose vices I might sing,  
Soon wedding bells, I'm sure, will ring:  
Virginia, Florence, Alice, and others I could name.  
They'll miss Minerva as they take their way,  
The statue that they leaned against each day.  
Poor love-sick saps, but I suppose they're not to blame.

Harriet Truby, they call her "honey",  
For such as she that name seems funny.  
I've never found just wherein that sweetness lies.  
She knows her onions, I admit,  
With scores of sheiks she's made a hit.  
To your weaknesses, you see, some one is wise.

Of myself I'll tell you not a word,  
But please don't judge me from what you've heard.  
I'm not always so frank as I have been tonight.  
But I think I'll stop my talking,  
And with it conclude my knocking.  
I'll ask your forgiveness and now step from your sight.

JOHN BRICE

## THE ADVANCEMENT OF AVIATION

"What a piece of work is man! How noble in reason! How infinite in faculty! In form and moving how express and admirable! In action how like an angel! In apprehension how like a God! The beauty of the world! The paragon of animals!" These words describing man are taken from a play written by the famous Shakespeare. They are considered the best description of the most perfect machine ever created—the human body. One of the faculties of this body is the power to imagine; to foresee. Men with great imagination have often been laughed at for their far-reaching ideas, and not one of them would be more fanciful than the person who foresaw heavier than air crafts flying at terrific speeds.

The first practical fulfillment of their idea was the airplane invented in 1903 by the Wright Brothers. The machine of the Wright Brothers was the first one to make any flight with a motor as the power. The present day planes are still built along the same lines as was that of the famous Brothers. Did either of these men think that their invention would ever reach the point of advancement to which it has attained in a few years.

Since aviation has been given the great publicity that only the present day is capable of giving we hear much of the accidents that occur almost daily. This is merely the outgrowth of the great number of people that are taking up aviation and also the seemingly great importance of each accident in flying circles. In many respects the airplane is more dangerous than our common carriers. There is always the danger of a bad take-off or landing, and their engine trouble means more than just a stop to repair it. But again flying has its advantages. We are not so apt to crash into another machine, for we have the whole upper air to navigate in, no railroad trains to keep a lookout for, no crowded streets or bad roads to contend with.

A few days ago a prominent inventor said that if a plane could rise from a standing position and could land in a better manner much of the danger of aviation would be eliminated. This is a new field in experiment, left for the coming generation to solve.

Proficiency in motor construction is overcoming one of the dangers of flying. Motors are being built that will stand up under the strain of fifty to sixty hours of continuous running, having to stop only because of lack of fuel. They are being adapted to all weathers and conditions. A good example of perfect engine work may be seen in any one of the numerous flights of recent much-read-about fliers. One of the problems that will face aviation engineers will be a new fuel. If a light, more compact fuel than gasoline can be found the cruising range of a plane will be almost unlimited.

Planes are becoming more practical every day. They will soon be a common unit of our everyday life. In a recent number of a science magazine was an article telling about the radical change brought about in the sealing industry. The airplane in this case is used as the eye of the outfit. It has the ship for its base and is able to cover great expanses of territory in a short time, telling the sealers exactly where to find the herds of seal. In the same manner the United States Government uses the airplane in scouting its great forest preserves. Thus we can see the great saving of time and money that is brought about by its use in this instance.

Carrying of mail is now one of the most important works of this new industry. Air mail routes are laid out all over the country, and the air mail is available to everyone. Letters and packages may be sent from the Atlantic coast to the Pacific in about two days. The pilots of the air mail are a dauntless set of men, in many ways resembling the riders of the Pony Rider Express in Civil War times.

Even in sport, aviation has not been neglected. During the middle of last year a mammoth air derby was held. It was from coast to coast and in many ways was similar to Pyle's Bunion Derby, although it was run in a much shorter time. While speaking of sport we might include the great trans-oceanic flight. Doing so, we may without the slightest hesitation call it the most dangerous sport of the day. Baseball had its Mathewson, football its Thorpe, and likewise aviation had its immortal Lindbergh, the present idol of the American people.

Distance today is no longer computed in miles, but in the expenditure of time required to travel from one place to another. Airplanes in the last decade have played an important role in bringing to pass this new aspect and conception of distance. It takes liners conceived by builders with the experience of many centuries behind them five or more days to reach American ports from Europe. It took Lindbergh, with a comparatively small plane powered by one motor, the short

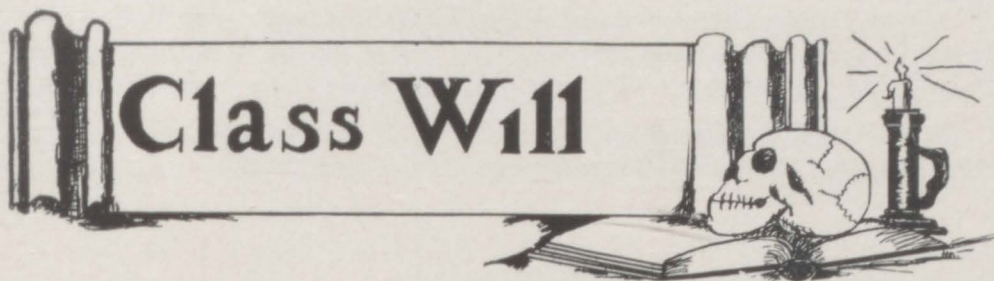

space of thirty-three and a fraction hours to cross this same route, and the builders of his airplane had not even the experience of one generation.

One of the great disadvantages of this new machine will be its destructive power in the next war. The damage that a fleet of airplanes could do to any of the great metropolitan cities of the world is almost too horrible to imagine. They will be able to carry huge loads of explosives to be dropped at any point they wish. This alone should be a good reason for the settlement of questions by arbitration that we may thus avoid war.

The United States, with all its great inventors, inventions, and mechanical ability, is far behind many of the European countries in the matter of aviation. An exception can be made in regard to our air mail. We are ahead of the rest of the world in this one matter of aviation to the extent that a committee of men are now here from Europe studying our air mail system. Enthusiasm is now coming to a point where great progress will take place in the next few years. It needs be if we are to keep up with the rest of the world. Passenger routes are established all over Europe. Africa and Europe are being more closely connected by airplane. Fields for landing and taking off will be a necessity of the future. The time will come when cities will have to maintain municipal fields if they wish to keep up with the rest of the country. New Castle today has two recently laid out landing fields, and we are hearing more and more each day about aviation, due to these fields. Emergency fields are also a necessity. The United States Air Mail between New York and Cleveland has a total of fifty emergency fields. A novel way to get landing fields closer to the hearts of big cities is to use the space over railroad tracks at the vicinity of the stations and build platforms over them. This may become a reality in the future.

Speed is the main asset of the airplane. A machine has been driven by an Italian army man at the rate of three hundred and seven miles an hour. If this speed could be kept up for the length of time that some of the men who have set endurance flights have remained in the air, it would take us more than half way around the world. There would be no city of any importance in the world that we could not reach in a single flight. People will say that we have no use for this speed. Every invention or improvement of any type has always been utilized; so we no doubt will see this put to some practical use. So, too, with the airplane in general use. After a few years it will be as indispensable as the automobile is today. So let us keep on with our experiments and improvements and make the airplane faster, safer, and more adapted to practical use.

HARRIET TRUBY

Let your tears flow on unheeded, underclassmen! We, too, feel the momentous importance of our graduation and are greatly downcast at the disaster it may bring to dear Ne-Ca-Hi. We have generously permitted Mr. Orth to be figuratively the head of the school, and to issue grants and commands according to our secret dictation. We have greatly enjoyed supervising the faculty, giving them our wisdom and ideas and our wealth of criticism in order that they might teach more efficiently and effectively. As to you—growing youngsters—we shudder to think what a mob of heathenish savages you would have been had it not been for our enlightening instructions and developing influences. Without the June graduating class of '28, the school, the faculty—nay, it is best that I refrain from chilling your blood with the horror of what may happen after we are gone!

In our three high school years we have collected as a class and as individuals, by inheritance and through our own initiative, a wealth of treasures surpassing all others. Perceiving your heart-rending grief at parting with us, the members of our renowned class have made this, their last will and testament, distributing among you their several belongings:

I.—These things concerning the faculty:

(a) We have labored long and hard to get Verna and Ralph engaged, and now we can graduate rejoicing in our success. To you, mighty faculty and summer students, we leave the task of getting them married.

(b) To the Sophomore B class we offer the right to chaperone Scoots and Marjory. We regret that we cannot give it to the juniors or young seniors, but we feel that we must establish a long term chaperone for these two, as they do not seem inclined to rush into holy wedlock.

(c) To Mr. Orth we dedicate the portables and suggest that they be used for detention halls for those who fail to get their hallway passes properly signed, or those who courageously write their own excuses.

(d) To Miss VanDivort we dedicate all the erasers, so that hereafter she may not need to mop the board with her hands.

## II.—In general:

(a) Tearfully Elmer Williams hands over his nick names "Percy" and "Sophistication" to some worthy sophs who will bear them as proudly as he has.

(b) Don Switzer gives his red hair, freckles, and line of jokes to some poor boy who fails to have any distinction.

(c) Mary E. Foster gives her taking ways and popular line of dates to Molly Livingston.

(d) Paul Palmer contributes his book on "How to Grow Up Completely in Five Lessons" to Sherwood Johns. Paul feels he must let some one else profit by its help!

(e) Mary E. Gibson leaves her G. R. announcement slips to the next president, with the suggestion that she use skates in her traveling.

(f) Clarence Bratschie leaves the rushing importance of being editor-in-chief, to Don McGown and Jack White, but he feels that he will need his personality in Sharon.

(g) Dave Kay's line for keeping two on the string goes to Otto Pearsall (he looks capable).

(h) Wendell McClurg leaves his promise to show any lower classmen how to win 'em and keep 'em by cave man methods. His wonderful success with Virginia would encourage any one.

(i) Virginia Knox and Florence Scott tenderly leave Clyde and Phil to the guardianship of the Senior B's with the one requirement that no one get too affectionate with them.

(j) The lunch period parkers, Virginia Clark and Bruce Alexander, Virginia Yates and Wendell, Pat Hanlon and Dave Vago, Walter and Alice Mae, and countless others, will the auditorium doors, the railing opposite 104, the window sills, and the statue base to future couples under the one condition that they be absolutely crazy about each other.

(k) Mae Ellen Fulkerson leaves her effective method of rolling her eyes to Martha Muse. It is quite appealing. Her memory is not large enough to consider giving it to any one else.

(m) Chuck Knoblock contributes his habit of riding home in a taxi after nine o'clock to some other poor fellow who is afraid to go home alone after the curfew rings.

(n) Mac Chambers, being in a generous mood, gives Paul McWilliams his supply of stories for keeping a girl out late—or should that be early?

(o) Mike Paulini leaves his supply of second hand Keith jokes and sayings and his act of telling fabulous tales to Chuck Nolan who rates second only to Mike in talking.

(p) The dramatic stars volunteer the secret recesses of the auditorium to next year's class—they are quite convenient to know, 'cause everyone doesn't practice at the same time, you know.

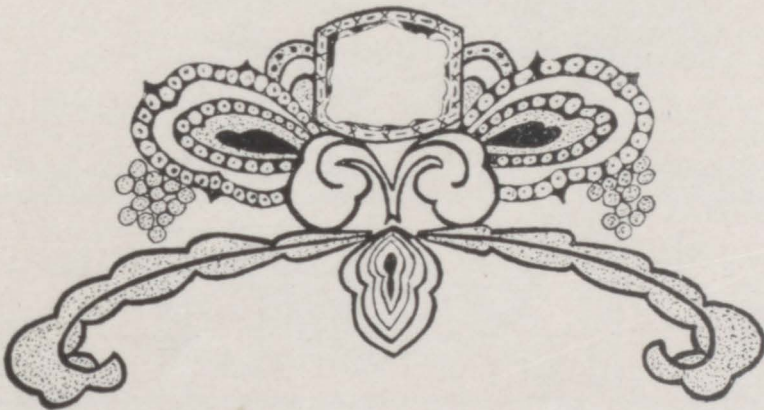

(q) Betty Steen wills her position of piano drummer to Ruth Call with this piece of information! Mr. Irvine does not think gum qualifies as an instrument for Senior orchestra and prefers that any such practicing be done in detention hall.

(r) Harold Burton and Louis Hazen leave the secret of their attraction to any one who can solve the mystery.

(s) Lawrence Hannon promises the evening street car schedule to any one who doesn't care to walk down hill or who finds his skates a nuisance on a date.

(t) Barbara Sleigh leaves her giggle and Latin pull to any sophomore who looks simple enough to appreciate it.

Jack White, Arabella Cobau, and Sherwood Johns, have, in the presence of Fred Blaha, Virginia Slee and John Brice, solemnly vowed to carry out our last request after our demise.

THE ORCHESTRA

## THE MUSIC DEPARTMENT

Within the past decade music work in the high schools of the country has made tremendous strides. A few years ago a high school considered its music program complete if it had a little choral singing. But modern high schools are improving their vocal practice and in addition are developing fine bands and orchestras. In fact most of the college bands and orchestras today are not comparable to the bands and orchestras found in the modern, up-to-date high school.

A school looks upon its musical organizations as a means of contact with the outside world, and in turn the public judges the general quality of all phases of a particular school's work by the kind of musical organizations which that school presents. Such judgment is more or less justified, for seldom is it possible for one department to produce work reaching the highest standards in a school where all departments are not likewise progressive and efficient. Furthermore it is not possible for one department to accomplish great things without some measure of co-operation from the other departments.

The Ne-Ca-Hi music department has closed another very successful school year. Its success during the term is creditable to the splendid co-operation of the administration, the principal, the faculty, the students, and the citizens. The department is grateful to each individual faculty member who has been so willing to co-operate when it has been necessary to change schedules, to have special rehearsals, to take students from classes for special performances, and to do many other unavoidable things so annoying to the classroom teacher. May she realize that her co-operation is appreciated and that she is largely responsible for the success of the music department. The organizations are grateful to the townspeople, also, who have given so large a measure of co-operation and support. We hope that the band and orchestra may be able to repay the town for its practical expression of interest.

Enough students have been graduated in the last eight years to make three bands and three orchestras as large and as good as the band and senior orchestra of the past term. Just as the beauty of a flower garden is soon lost when its cultivation is stopped, so the ability to play an instrument soon disappears when practice ceases. The development of one's musical talent has only been well started by the time one has finished high school. Therefore it is obvious that New Castle could have a wonderful community band and orchestra if some provision were made to select and continue to cultivate the talent of the best student musicians who graduate from Ne-Ca-Hi each year. A Community Symphony Orchestra should be started first, one which would be open to anyone of either sex on the basis of individual ability. If some organization would guarantee to back it, New Castle could soon possess this wonderful orchestra.

THE STUDENT COUNCIL

## STUDENT COUNCIL

Supervisor—Miss Rhodes

### MEMBERS

Senior A—Robert Weingartner, Howard Sage, Gertrude Potter, Jennie Wygonoski, Johnny Johnson.

Senior B—Robert Perry, Donald McGoun, Alice Throop.

Junior A—Otto Pearsall, Virginia Walls.

Junior B—Jack White, Norma Smith.

Sophomore A—Ronald Anderson, Florence Porter.

The Student Council of Ne-Ca-Hi is a student co-operative association. Its purpose is to work with the faculty and student body for the betterment and control of the school. The general aims of the organization are to promote the ideal of co-operation, to develop efficient leaders and loyal followers, to make each student feel responsible for the success of the organization and the improvement of his school, to create sentiments of law and order and respect for the rights of others, to encourage the desire for higher scholarship, to determine what are the accepted forms of good usage in manners and morals and encourage the practice of them, to promote the general welfare of the school.

The organization is composed of two houses, the Council proper, which is made up of a graduating number elected from each class; and the House of Representatives, composed of one member from each session room.

The Council of 1928 has acted more in the legislative and judicial capacities, while the executive work has been merely supervised by committee chairmen from the Council. The specific aims of this semester have been to develop leadership, to encourage an individual responsibility for the betterment of the school, and to create sentiments of law and order. Two new projects have been worked out: the card system of checking attendance, and the hall monitor system. This work has been done by the team chairmen from the Council and Representatives, and team members selected from the school at large. In addition to these projects, the Council has handled problems which work directly or indirectly to develop aims of the organization into practical working results.

### OFFICERS

Vice President .....	Mike Kulich
Secretary .....	Mary Elizabeth Gibson
Treasurer .....	Zella Myers

The Representative body is composed of one member selected by each session room to represent the room membership at the organization meetings. Their purpose is to work in harmony with the Council proper; their aims are the same. More actual service has been done this semester by the Representative body than ever before. The locker service has been handled entirely and in a most efficient manner by its members, the new attendance plan has been handled by representatives and other pupils chosen by them, and many representatives were on the hall monitor teams. Not only has the representative body been active, but it has succeeded in interesting a large number of students in the work. The success of the organization is due not to either body alone, or to both combined, but is a result of a spirit of co-operation between the Council proper and the Representatives, and to co-operation between the organization as a whole and the student body and faculty.

THE BOYS' VARSITY BASKETBALL TEAM

## BASKETBALL AND TRACK

Physical exercise is the best means of acquiring a good physique. Many of us are unfitted for the arduous trials of participating in competitive athletics, but we can encourage and lend our support to those actively engaged in them. We should especially be interested in teams sponsored by our school for the sake of school loyalty. Our school is fortunate in possessing Mr. P. H. Bridenbaugh, one of the very best athletic coaches in Western Pennsylvania.

In basketball, we had a very successful season in finances, in games won and lost, and in general interest shown. Our team won the championship in Section III over stiff opposition and was defeated only in the final game of the W. P. I. A. L. eliminations by the Duquesne High School team. It might be interesting to know that New Castle played before the two largest crowds that have ever attended these elimination games. Lack of adequate seating accommodations caused us to turn away hundreds of people at the more important games.

Tony Ostrosky, captain-elect for next year, was chosen All-W. P. I. A. L. guard. Others who made the sectional teams were Paul Reider and Arthur Sillman.

In track, our team has been handicapped by the absence of outstanding performers in the more important events. This is attributed to the fact that very few veteran men were left from last year to form the nucleus of this year's team. Arthur Craft, our most consistent performer, won first place in the javelin in both the Carnegie Tech and the W. P. I. A. L. meets and also placed in both the discus and the shot put.

In another respect the track season has been a great success, since keen interest was shown in it by the boys of our school. Over one hundred and thirty boys, the largest number in the history of the sport in our school, came out for track and participated in this most excellent form of athletic activity.

## DIARY

September 6—Dear old Diary, such a day! All the old gang were back, and, believe me, the air was blue with “halloos” and vacation gossip. At last some of our male classmates have outgrown the infantile stage; some are sporting their first long “jeans”, and others have acquired the collegiate air that accompanies KNICKERS and CIGARETTES.

September 9—Diary Dear! My neglect has been frightful, but truly not intentional. Between renewing old acquaintances and becoming accustomed to a perfectly horrid schedule and teachers that can't assign enough work, I have hardly had time to date—a terrible social error to make so soon before the first high school affair.

September 16—Whoopie! Tomorrow's the day when our boys step out in battle array. Fate, be kind!

September 18—Fate did her stuff! Our boys fairly trampled all over Grove City (the mud helped us do the job up right). 19-0! Such a score would add spice to the flattest Sunday nite date—

September 21—Oh Diary! What charming “school marms” are slowly drifting into the ranks of our more sedate “instructors”. Honestly some of our dignified senior boys have the **crust** to imagine that **THEY** might be eligible for dates. Imagine!!!

September 25—Franklin was our helpless opponent yesterday. Poor boys, it **was** a shame to cover their one wee touchdown with our 39 points. They did their darrest tho'—and what more can any team do? Now I ask you!

September 28—Just working—that's all.

September 30—Watch our dust when we meet Mars tomorrow!

October 2—We did! We did! That team didn't know what struck them after the kick-off. We have a TEAM and how!

October 5—Minerva still has the co-operative support of Alice Mae and Walter every 5th period. Half of the weight has been shifted

to Florence and Phil's shoulders—these marathon affairs are becoming more popular.

October 6—O Diary Dear, we are having a dance—a real honest-to-goodness Thanksgiving dance. I'm so thrilled!! Yes, it's Donora Saturday—easy picking and not a bit exciting.

October 9—Did we win? Please “don esk”—You could hardly say that we lost with the score 58-0. Yea, Team! Bridie and Ralph!!

October 14—School is so blame slow the only kick I get out of life anymore is watching, along with other poor timid souls, the sly departure of our more venturesome mates from Study II 9th period. We are thankful to those bugs that made Mr. Shelar nearsighted!

October 16—History repeats itself—so they **say**—at least our football scores always do. We took the Day from Dayton that time—eh what? You said a mouthful!

October 19—Diary Dear, mother's making me the darlinest costume—why, I almost forgot to tell you that **we Seniors** are actually having a party—minus the rest of the school. Just watch the infants rave! Well, Diary, one must grow up **some** time even though the faculty vetoes all our attempts.

October 22—Good grief, Diary, are my dogs barkin'? Nothin' else but! No wonder, after hoofin' it around with the senior class president and some other “GOOD” dancers. What puzzles me is where these senior shieks take toe-dancing lessons?

October 23—Oh, Diary, **now** I understand the phrase “Oh, Death, where is thy sting?” What could be worse than to be beaten by Youngstown (unless it would be by Ellwood)? Oh, well, such is life!

November 1—A revolution almost arose today when the first advertisement sheet came out—oh excuse me, I mean the Monitor! Gosh, Diary, it looks like a bargain day edition of the N. C. News and has much less in it.

November 3—Just a line before I lay my weary bones to rest. Those Sophomores B's are more bother than they're worth! All this work for a mere Sophomore Reception!!!

November 6—Well, it might have been worse, but I've had better times. The program wasn't so bad, but oh the strain of allowing the dear little sophs the privilege of signing their “John Smith's” in my book! This is the birthday of our female Padarewski—she's only seventeen, Diary—or I **should** say a maid of seventeen “Winters”.

November 8—Thank goodness, Diary, at last the time has come when we will be no longer bothered with these sophisticated snobbish

Senior A's. Their days are numbered—January 27 ends it all. Then, perhaps, the school will be run as the majority wants it!

November 11—Diary, dear, you should be glad you are not expected to be patriotic and sell poppies to people of **this** community. I'm sure they're of Scotch descent; some of them would have been generous enough to donate plugged nickels if they could have gotten away with it. Here's hopin' the Legion doesn't forget the dance, or I fear the "patriotism" of some of our Ne-Ca-Hi Shebas may wane before next year.

November 13—Revenge is sweet! I swiped "Her" sweetie for a date tonight. Not so hot, though—some people just **can't** grow up.

November 15—The second penny edition made its debut today. Oh, well, it serves the purpose (to read in study hall) and pleases a certain few.

November 18—Nothing doing in Prison today. Same old trials and executions. "Vandy" almost had a conniption—the "Weekly Nap Hour" (Chapel) lasted way over 4th period. Hot socks, no assignment for tomorrow!?!

November 21—Who Ray! This is my idea of a perfect school week. Just three days of confinement and then freedom, big eats, and the dance.

November 23—Diary Dear, I'm all aflutter! How divine to have a spiffy dress and a perfectly gorgeous date for the dance Friday nite. I hear the gang will be out in full force, which means keen competition, especially for Mahoningtown!

November 24—Gee Diary, Big Dinner—Football game (victory too)—More eats and now I must go "pretty" myself for the Man o' the Hour.

November 25—For once we've had a Dance that was one in the real sense of the word. EVERYBODY was there—even "Marjorie" and "Scoots"—Evening attire too, by golly!! Ralph was a good old scout for arranging such a good time for his most worthy team and the rest of us thankful creatures.

November 28—Back in the harness today. Too bad the seats are so hard and the teachers so unfeeling. It limits the prospects of post-vacation rest.

December 1—Diary Dear, the place faintly reeks with the atmosphere which proclaims graduation is approaching—measurements were taken for the "Grey Nighties", and the "Gimmies" were ordered.

December 2—Miss Hartsuff's children showed off again. I wonder if the "Pollyannas" always play the "Glad Game"!?!

December 7—This is a blissful week for the teachers and a wretched one for students. Studying reigns supreme—there is nothing else to do.

December 10—Who said education is free? If we are not paying for a tiresome lecture we're buying toys for children. But why cry the blues?—money must be kept in circulation.

December 15—How to use fifteen yards of ribbon and a gob of stickers on one Xmas package—**that** is what we learned in Chapel today—just feature it!

December 18—Anyone would know Christmas is near. Candy and flowers are as scarce as A's in Ockey's room. Evidently some girls will get worthwhile gifts on the 25th—thanks to the thrift of our far-sighted males.

December 19—Dear Diary, things are going from bad to worse; who would have thought the day would come when we were forbidden to use the office phone? When anyone does get up nerve enough to venture into the office the temperature is lowered to such a cooling degree by the frigid looks of the "stenogs" that immediate departure seems advisable.

December 21—Imagine, Diary, the most unusual thing happened today—Our beloved principal **actually** smiled! It was like the sun melting the top layer of a glacier and so frightened our sophs that they were dumfounded.

December 22—Santy came to Ne-Ca-Hi a little previously, but he came just the same in the form of (well who'd a thunk it) "Scoots" Nelson. All he needed was the whiskers and a red suit—sans pillows—to make the typical fat Santy.

December 23—Goodbye, Diary. I won't be telling you secrets for several days—I'm goin' on a Choo-Choo far away from work and worry. What bliss!

January 1—Happy New Year, Diary! I made some resolutions last night, and I have only one left unbroken. Good record? That last one will probably be mutilated before "moon set" tonight. But who ever heard of a resolution that wasn't broken some time; in fact—very confidentially, Diary—I believe resolutions were made to break. Don't you?

January 2—Trusty Confidante—I crammed every possible joy with this one little day—my last day of real existence until March 31, you know. Oh! well it won't be long now. May the fairies hasten June 6.

January 3—It ended—and I took up my yoke as heroically as those Trojan warriors "Mary E." is continually spouting about. Oh

Diary, they have started preaching about mid-term exams—study, Study, STUDY!

January 4—Why must we be reduced to mere children so often? This afternoon we were “marched” (no, not hand in hand) over to the Cathedral to hear a couple of fellows exercise their tonsils. One relief tho’—the seats over there are certainly comfortable—I had an enjoyable nap and felt rather keen for my date tonight, thanks to the soothing lullabies of Gordon & Johnson.

January 6—Oh Diary—such a picture! The Senatus Romanus presented a movie today. The whole school turned out—who wouldn’t pay a dime to get away from recitation period? Any way, the picture was a perfect scream—the characters were dressed in “cast off” bed sheets draped about their shapely figures and wept on each others’ shoulders every other minute. The hero may have been a dashing young Roman in Caesar’s time, but give me a man of a later date—with some sewed up clothes and shoes that didn’t show his big toes!

January 9—Everything is getting set for graduation. I received a “Gimmie” today. Bye-bye, hard earned money!

January 10—The honor students have been made known. Guess it was a pretty tight race this time. Oh yes, Virginia was given first honors. I expected that tho’—that girl is not so dumb.

January 13—We poor Senior B’s have as little show around here lately as a deaf and dumb man at a baseball game. It’s glorious to think we’ll be the “big cheese” in a few more days.

January 17—I **have** been forgetting to tell you about our basketball games, haven’t I? Oh, yes, we have a team. At least that’s what they call these five fellows who gallop around the gym for the benefit of us females. They won the first game—played with Grove City and since then have defeated Mars, New Brighton. I guess they have a “slight” ambition for the W. P. I. A. L. championship. So much for basketball! It bores me to tears anyway.

January 20—Gosh Diary, it’s amazing what a little notoriety will do; it used to be “Hello, Old Pal”, but now it’s just a breezy uninterested “Hi”. Please, Diary, don’t be “nibby” enough to expect an explanation.

January 22—I attended my first baccalaureate service tonite—I must know how to act next June. Dr. Williamson did deliver an impressive sermon—I wonder if it sank in! Honest true—I hardly recognized the leader of the procession without her usual quota of camouflage. Wouldn’t it cause a sensation if some of these would-be flappers were seen some day in their natural “shade”?

January 24—The inevitable investigation of the intellect leaks in upon our peaceful state of mind to-morrow. It won't be long now before we know whether we "stay put" or move up one.

January 25—This was show off day at Ne-Ca-Hi! And there were plenty showing off. The program was much the same as it has always been—with a few exceptions, for better and for worse. Bob Turner's act with Ray Toler seemed most natural. Shh!!!!

January 26—Some more of the Seniors did their stuff tonight. It is the first time I ever knew that it was necessary to purchase a Latin medal—but then evening gowns and fur coats **do** look well from the stage. I felt terribly sorry when Louis forgot his speech—perhaps if he had not tried to use such big words he would have remembered a little better. Every one says his oration was splendid—Me? Oh! I don't know—it took the whole evening for me to get a line on the dresses.

January 27—It's done, finished—all but the fire works—The Senior A's have gone out like a candle in a swift breeze. It's a darned shame that there could not have been more graduation programs—then perhaps some of the celebrities could have appeared to their heart's content. They did their utmost, and we all appreciate their GOOD intentions.

January 28—Well, Diary, old friend, we have three more basketball victories to our credit, but I'm afraid we are going to need all the credit we can get for our combat tonite. It would be a crime if Youngstown did trim us in basketball.

January 29—Fate certainly did us dirt last nite! Those wretched fellows from across the line topped us with one point. "Superi"!!

January 31—We always have the good with the awful, and tests bring some of us three vacation days—unless our exams are all spread out.

February 1—Humph! Guess we didn't have a graduation after all!—Enough of the alumni came back to take up a lot of useful room—especially with the gang of new sophs polluting the place.

February 2—Did the ground hog look over his shoulder, or did he not? Who knows? and furthermore, who cares?

February 6—Minerva underwent her quarterly splashing today, and with it went the much entangled flock of "Who is me's". Poor lady—she serves as a clothes rack, a book shelf, a leaning post, a memo pad, a supposedly beautiful ornament and greatest of all, the evening terminal of not only the bewildered sophs but even of some of our super classmen, who really should congregate elsewhere.

"Minerva! diu vivat!"

February 14—This being leap year didn't seem to have any effect on the affairs of the heart. A heap of the boys did their duty today. Oh yeh, Diary, I was remembered, too. And how!

February 15—Gee, Diary, maybe we do have a chance for that championship. We now have Mars, New Brighton, Zelianople at our feet.

February 16—I forgot to tell you, Diary dear, about the beautiful lady who sang for us Tuesday. It was no other than Mary Lewis, the prima donna—and listen! She not only sings, but she has personality and is surely easy on the eyes. Oh Diary—if you could have seen her—she looked positively delightful in her orchid outfit—all shimmering and sparkling with beads.

February 22—We had our usual birthday program for dear old George; "Vandy" was in charge; so of course it was very well organized and—**ended on the very last minute of third period.**

February 27—Look's like some one of the faculty is going to be wearing a boulder soon.

February 28—The new Monitor has advanced so far as to include a comic section. Huh! It isn't every school that can offer the "grinning likeness" of nine Elmer Tuggles', Tillies, Salesman Sams, et cetera!

February 29—Whee! This one day in four years that looks bright to the poor souls seeking entrance to the world of romance. Wonder if there were any accomplishments.

March 1—Dear Diary—speaking of love, some of our illustrious Seniors must be developing that well known "Spring Fancy" (although March certainly didn't come in like a lamb). It is perfectly killing to watch the dished-out far away expression on the faces of certain members of the "Baby Class". Poor kids, they'll get over it! It doesn't pay.

March 4—Can you beat that?! There I got all dolled up for a hot date and then didn't he have the nerve to call at 8:15 and inform me he couldn't come! Thus endeth the remains of a pleasant evening in Youngstown. I don't doubt I'd have seen loads of the gang there. Such is life!

March 6—Believe me, Diary, if you want a thrill just get your picture taken. I was so scared that when he said "smile" I looked as though I couldn't for fear I'd crack the enamel. I'm not the only one that has to go through that torture; I notice other seniors are having their's taken for the Rogues' Gallery, too—partners in crime, I guess!

March 7—The Educational Art Society educated us chilluns this afternoon with Dick (pardon me, I mean Rich-ard,) Crooks. It's plain

to be seen we have better artists in our own school; at least from the bored and critical attitude of some of our students, you'd have thought they couldn't learn anything from Dickie-bird. Some of our "infants" were **so** bright as not to know any better than to clap when two janitors moved the piano.

March 8—When the seniors condescend to come off their perch and meet and greet the incoming school children (commonly termed sophs) **that** is called the Senior-Sophomore Reception. Twice a year I've been compelled to don my best duds and sally forth to be bored to death, and tonite I went again. Of all the ones I've **attended** this takes the skates! A terrible program, a worse crowd—what more can be said? I might mention, however, that one of the senior class seemed to find the water very good. Now the question is, What was in the that water, I ask you?

March 12—Dear Diary, Blue Monday is right! Who wouldn't feel like indigo with another essay staring you in the face—this time on a more impossible subject than ever. Thank heavens it isn't due for a month, anyway!

March 13—My own Diary, I just couldn't resist the temptation of telling you the big news. Didn't I tell you our team was a winner? Hot spit?! Monesson never knew what hit them when we started to play. There were other excitements aside from the game, though, such as the trip home—nuf said!

March 16—I'm a thinkin' they should have called the "Tightwad" the "Show Off" again this year. For several days now Miss Hartsuff's pets haven't recognized any of us more common folk. The show was all right, but not so steam-heated as it might have been. Gosh, and the so-called orchestra that played between acts corresponded with it grand! What **is** this high school coming to?

March 17—For two days I haven't been able to think of that game without wanting to blubber like Niagara itself. I couldn't even write about it—let alone mention it. Diary, we **lost**! Well, I should say we did. When we're good, we're very good, and when we're bad we're terrible! That was our team Thursday nite. Oh well, no use crying over spilt milk—better luck next time. Good-night, old sock!

March 19—Dear Diary, did you ever feel that you'd like to scream if something exciting didn't happen? Well, I'm going to blow up if something doesn't stir up this school pretty soon. Everyone looks like sleep-walkers—not so much wonder though. The beloved faculty hasn't much sympathy for the morning after the date before. They ought let little boys like Sam Fisher and Elmer Williams sleep in peace **at least** in Study Halls. Cruel, cruel world! You said it!

March 22—Chapel or Confinement Hour was one of the penalties of today. Imagine it, Diary, it was supposed to be Irish with names like Isabelle **Thomas**, "Sher" **Johns**, and Virginia **Yates**—if they're Irish, then I'm mongrel. It wasn't bad, though, at least I didn't go to sleep (which is saying a good deal for a chapel program.) Some of the participants offered us quite a little amusement—such as forgetting their poems—ahem!

March 23—Dear Diary, ain't I gettin' good, writin' to you one night n'other? Nothin' else to do—I got home from the G. R. Mama's and their little girls' feed, early, so now I'm going to turn in. Oh, yes, I had a thrilling time, do I need to say so with—oh well I'd better not mention names.

March 26—One of our dear little infants amused a big husky senior muchly today by wanting to know **who** this Senatus Romanus was that everyone was raving about. I don't know what the senior said, but the answer should have been "Vandy". Oh yes, dear Diary, there are still "Romans" around; the dear little things have cute little pins to wear (fifty and seventy cents apiece). Bless 'em hearts!

March 29—Honestly Diary, you'd think there actually **were** some bright students in this school to see the size of the Honor Roll, but everyone knows they are the students with the "best line". Some of them have the faculty roped, tied, and haltered to judge from the number of A's. I never did see a girl that could run as many cases at once as a girl living on Pine Street. "K" seems to be the favorite **now** but who knows what the morrow will bring?

March 30—Diary Dear, for once the "val" and "sal" have been chosen in time for them to prepare decent speeches. We have a pleasing variety—everything from basketball to Senatus Romanus. Gertie! Jennie! Goodlooking! Versatile! And How!!

April 1—April Fool's Day, and a certain little girl's birthday—but she's no fool—just ask Bill! Gosh what a heavy date I had tonight—laugh that off, Diary!

April 2—Vacations are the only things I look forward to, and now at last here we are on another. You know, Diary Dear, what fun it is to do **anything** under teacher's supervision—well just picture the fun the kids are having in Washington, D. C. under the eyes of some of the faculty! None of that for mine, thank you!

April 5—Ye gods and little catfishes! The unbelievable has gone done and happened! Ralph Weide (you know, the science teacher that never cracks a smile) and Verna Allison (beloved Monitor supervisor) have told the world that she is sporting his diamond and soon there will be "Just a Cottage Small for Two". Diary, henceforth and forever more I'll believe anything can happen!

April 7—Dear Diary, my heart is going like a trip hammer. Heavenly days, what if I shouldn't get a bouquet tomorrow. Here I've gone and rigged myself fit to kill, but if I don't get a corsage, I wouldn't dare venture out. Pray for me, Diary!

April 8—Nothin' could be sweeter than to don your Easter duds and posies (I got 'em) and sally forth to show the world you're someone's beloved. What joy, what bliss, and what a date!!

April 9—Back in the old grind again—oh my! The travelers swear they had a good time in Washington. Maybe so, I don't know, but at least you've got to admit they're game! From the reports the girls gave today, the florists must have done a rushing business yesterday. Poor fellows—I bet there'll be few dates this week!

April 12—Well diary, we have ordered the "I ask you; you send me a gift's" and at last the time seems to be actually approaching the end of school and the final goal—graduation. The girls have decided what will be the most becoming and incidentally the cheapest to wear—looks like business now.

April 16—Dear Diary—yes I admit I have a lot to be thankful for—thank heavens I'm nearly done—every day in every way, school is more like a jail. The latest development that the Student Council—alias Miss Rhodes—has concocted is the new patrol system. This is the most diabolical scheme they could think of to make Ne-Ca-Hi seem more like a penitentiary. In case of death or serious illness you must get a hall pass in order to leave the room—feature it! The good old days have gone forever! Thanks to?!!!

April 18—Oh yes, Dear Diary, Papa Orth has decreed the Monitor as a paper (such as it is) must go on another year. Now all the sophs and juniors are scrambling for a position on the staff as a means of loafing (?) 9th period and so they won't have to pay for their Monitors. (You can't blame 'em.)

April 20—Dear Diary—Danger—Beware! That's what everyone had to do this day in school—it wasn't safe even to whisper or surmise who—gee, I haven't even explained it to you yet. Well here is the trouble. Ne-Ca-Hi received a new coat of paint somehow, somewhere, and by some one, but who?—aye, there's the rub. The culprits have not been caught and can't be. How **thoughtful** of them to print forever the Class of '28 on Ne-Ca-Hi's memory! Very clever artists though—**very**?!!

April 24—Well, Diary, I wish you could see the piano—it looks like a rogues' gallery more than anything else. I have everyone's face—both important and unimportant—mostly the latter, though.

May 1—Oh Gee, Gosh! I forgot to wash my face in dew this morning. Now I will be glorified with freckles all summer.

May 2—Dearest Diary, we had the most fun in chapel today. The lecturer certainly has a fine conception of us dignified students. Mind! He had the crust to tell us we were merely square pieces of black felt—being trimmed into shape by our **dear** teachers. Humph! Imagine them trimming some of us! This world, the next, and then the fireworks!

May 3—1, 2, 4, 5, 6, 7, 3, 8, 9! No Diary, that's not a football signal—it was the order of our classes today. For the **second** time this **week**, we had a really interesting chapel program. This time a "human monkey" an impersonater in other words, told us all about "the kingdom by the sea" and kept us laughing with his "hand follow the wrist movement."

May 7—We're taking those hateful old state exams today, and, Diary Dear, they are just TOO MUCH!

May 8—They're over! Such a test in Solid Geometry—Whew! I'll bet Ralph couldn't have answered half of 'em. Most of the kids flipped coins for the answers on the "true and false" page.

May 11—Dear Diary, did I tell you our band took first place in the Sectional Contest last week at Grove City? Well, now they're off to Harrisburg. O Lady Luck, do your stuff! Poor "Izzie" is the only lady in the crowd—unfortunate soul!

May 13—Mother's Day, Diary Dear.

May 14—Oh! Chile! Our dinks came today. Now we can run competition with the New Wilmington "Frosh".

May 16—Dear Diary, our "invites" have arrived—Post office! Hey! Hey!

May 17—We're reviewing now, Old Boy! Nuf ced!

May 21—Gosh! Diary, the Student Council is becoming really kind—perhaps to appease the ire they aroused by their efficient monitor system! They entertained us today with a snappy film "Her Summer Hero." No sir, it was **not** an **educational** picture—yes I know that's almost unbelievable but nevertheless the truth! This is too much!!! (or our just due)?

May 22—Senior exams started today. What could be worse?

May 23—We're still being tested.

May 24—This was OUR DAY, Diary Dear. For once, we ruled the place! And **How Nicely Everything** came off!

May 28—We're all busy this week! The girls are rushing about madly trying to out do each other in class night clothes, and the boys are calmly buying their white flannels.

May 30—Dearest Diary—you should see my gifts. I wouldn't mind graduating every six months. Gee, it's great!

June 1—Well, Diary, we have gotten our gray "nighties" and caps and tickets so that our folks can come and see us "Commence".

June 3—We had our "preaching to" this evening. Rev. Landis started us off on our eventful week with plenty of good sound advice. We'll need it before we are through.

June 4—Oh Diary, our play was a "wow".

June 5—Whew! Such a heap of pretty dresses!! Our program went over big—but the donors revealed some amazing secrets!

June 6—My Dear Diary, it's all over! O "Pal of My High School Days", I have actually graduated. Gosh! I feel queer and detached. The last year which I have shared with you has been so full of happy times—times that we won't forget soon, huh, Diary! I'm only hoping the secrets we share next year, although they can't excel, may at least be as wonderful as those of the past.

Good-bye, Dear Diary—'til next September.

### ADVICE TO THE LOVETORN

Dear Miss Lotta Bunk:

Will you, won't you, oh, please do answer my question? What is a kiss?

HAROLD (Doc) S.

Dear Harold:

A kiss, dear boy, is a starter for a lot of trouble; so steer clear.

LOTTA BUNK.

Dear Miss Lotta Bunk:

Won't you kindly suggest a cure for Phil's undergrowth? My back is almost broken from slumping down to look decent beside him.

FLORENCE.

Dear Florence:

There is no such a cure. Either choose another mate, or wear lower heeled slippers. I'm sorry.

LOTTA BUNK.

---

Dear Miss Lotta Bunk:

I'm in love with one girl from Mahoningtown, but am also attracted by another girl from the East Side. Which should I choose?

WENDELL McC.

Dear Wendell:

My advice to you is to keep on loving the girl from Mahoningtown and form a Platonic friendship with the other (as you are doing). That will save embarrassment and trouble.

LOTTA BUNK.

---

Dear Miss Lotta Bunk:

I have at last decided to be a bachelor, but I am not quite clear as to what the term means. Please advise.

PAUL P.

Dear Paul:

You are on the right track—keep up the good work. A bachelor is a man who can successfully make love to other men's wives and not get entangled. He is a man who looks twice and doesn't jump.

LOTTA BUNK.

---

Dear Miss Lotta Bunk:

I'm deeply in love, but for some reason cannot express my feelings when near my lady fair. What shall I do?

HAROLD BURTON.

Dear Harold:

Why not try "Real Love Letters and How to Write Them?" If that doesn't work—"Say it with Flowers?"

LOTTA BUNK.

---

Dear Miss Lotta Bunk:

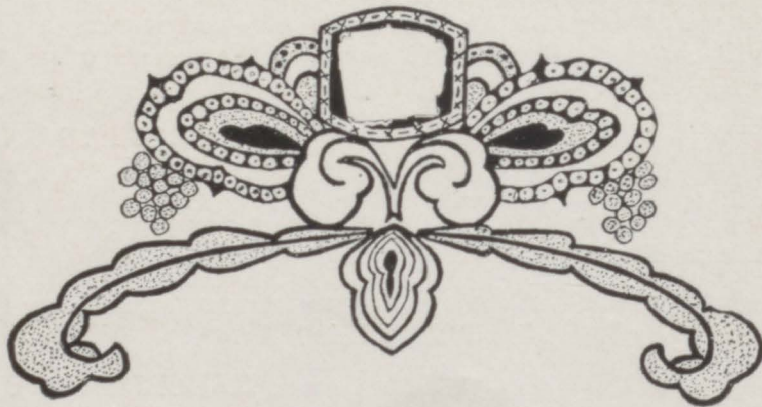

I'm all in a muddle! The girls seemingly can't stay away from me. I'm terribly troubled. What shall I do?

LOUIS HAZEN.

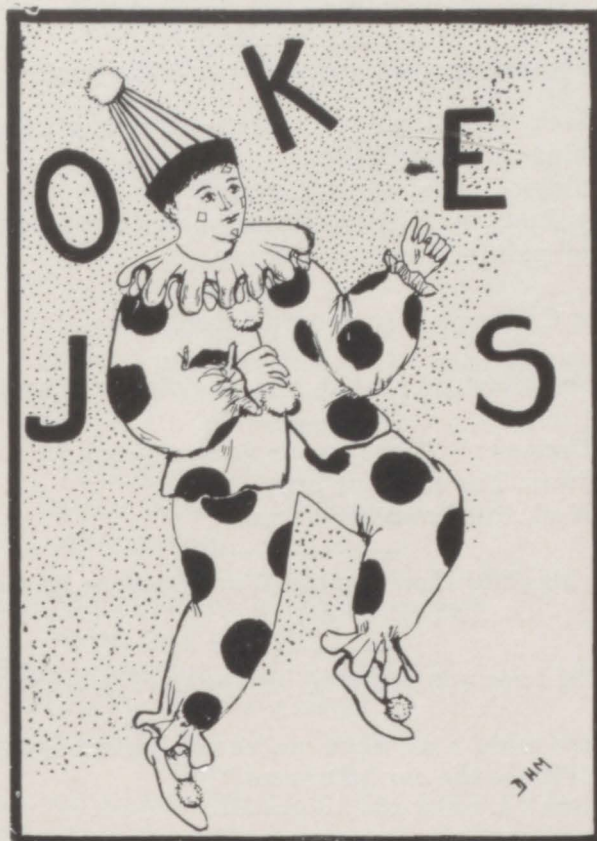

My Dear Boy:

I'm afraid you have a serious case of misinterpretation and over-estimation. You know, new cars are very attractive regardless of the driver. Be yourself, and take a good look in the mirror.

LOTTA BUNK.

Pearson: "I want to buy some gloves."

Mr. Nelson: "That's the bunk. What'd you want to get that book to be read out of for?"

Boy: "That orchestra isn't very good, is it?"

Girl: "It is having trouble keeping up to you."

"What did he sell him for?"

"Chewin' the piano leg."

---

"I was in a big hotel robbery in Pittsburgh!"

"Is that so? Tell me all about it."

"I took my girl to dine at the Schenley."

---

God save the Irish; no one else is making any efforts.

Bystander: "Are you an instructor in this school?"

Mr. Margraff: "No, I merely keep the gang together for forty minutes."

Pauline: "What can you sit on, sleep in, and brush your teeth with?"

Everybody he asked: "I couldn't tell you."

Mike: "A chair, a bed, and a toothbrush."

He is the kind of a guy that asks a newsboy who won the football game.

The girls all call Hazen "Mustard", for when he dances he is forever on their dogs.

Conductor (On Pittsburgh Basketball Special): "What are you doing in there, young man?"

Howley (between seats): "Bleacher section, sir. I'm getting used to the poor view."

Wife: "Henry, baby has swallowed the ink!"

Professor: "Write with a pencil, dear."

Alice Throop: "What is that?"

Mac C.: "Just a common red squirrel."

Alice: "Really. Should I notice it?"

The average high school girl, generally speaking, is generally speaking.

"What are you going to do with your boy Charles, when he gets through high school," asked a friend of Mr. Knoblock.

"I hadn't thought of that," replied Father Knoblock. "I was wonderin' what the Hi School was going to do with itself when Charles gets through with it."

Tippy R.: "She told me so herself. She said she couldn't teach me nothin'."
